

SIMPLE IS BEST, and LESS IS MORE  
**That is STADT LEAN PROPULSION !**

What overrules all other benefits is - **RELIABILITY !**

Anything else has **NO VALUE** If the reliability is not under control, and **NO ONE** can beat us on that issue !

All issues are listed up in our brochure and guideline, 25 issues.

We can mention a few of them that are very much connected to RELIABILITY : Life-time, Life Cycle costs, CAPEX and OPEX, MTBF, MTTR.

*Technically related issues such as :* COMPLETELY FREE FROM NOISE, NO EMC/ EMI, NO Harmonic distortion THD, No extra acoustic noise due to sinusoidal control.

*Ship designers and yard will like to hear that is :* Very compact, low weight, does not require expensive screened power cables, does not create interference problems – guaranteed.

*Ships owner :* Reliability, safety , no big service invoices to roll – for many years, good second hand value of the ship with Lean Technology !

*Operationally related issues :* Does not need very highly qualified crew onboard to take care, Spare parts easily replaceable, plug and play, no explosion risk in cabinets

*NAVY :* They love our STEALTH performance – guaranteed NO NOISE, EMI, EMC, is very compact, and HIGH POWER is possible when they need so.
